PROFESSIONAL SUMMARY

Systems Support Specialist with over 7 years of experience managing mission-critical application infrastructure, data connections, and incident response pipelines. Adept at handling platform configurations, monitoring end-to-end data flows, and executing root-cause analysis within SLA-driven environments. Strong functional grasp of enterprise integration models, API structures, and identity access management.

TECHNICAL SKILLS

- **Enterprise Platforms:** SAP Integration Suite, SAP CIAM, SAP Analytics Cloud (SAC), RISE with SAP Methodology, SAP Sales and Service Cloud Administration.
- **Data & Core Tooling:** API Development (REST), Python, SQL (PostgreSQL), Schema Design, Supabase.
- **Incident Management & RMM:** ServiceNow (ITSM), Zendesk Support, Incident Resolution, SLA Monitoring.
- **Infrastructure & Security:** DevSecOps Methodologies, Identity Management, Encrypted Transit, Log Monitoring, Access Control.

PROFESSIONAL EXPERIENCE

Cami Project | Lead Technical Operations & DevSecOps Initiative (School Project) Jan 2026 – Present

- **DevSecOps Integration:** Managed the end-to-end operational lifecycle for the Cami application, implementing "Secure by Default" methodologies to automate security checks and maintain system integrity.
- **Continuous Monitoring:** Maintained real-time system stability, proactively identifying connectivity bottlenecks and security anomalies using cloud-based monitoring tools.
- **Identity & Access Governance:** Engineered user provisioning workflows, enforced multi-factor authentication (MFA) protocols, and audited profile access logs to ensure strict adherence to secure identity management standards.
- **Operational Resilience:** Logged system glitches using structured ticketing protocols, performed root-cause analysis for recurring bugs, and authored technical documentation to ensure rapid incident recovery.

Legal Tech Support & Admin | Law Office and Realty Jan 2025 – Oct 2025

- **System Optimization:** Modernized manual file workflows into a digitized index management system, reducing data retrieval latency by 40%.
- **User Support:** Served as the primary point of contact for software glitches, hardware mappings, and application access requests.

Technical Systems Specialist | GSMS (Engineering & Mapping) Jan 2019 – Dec 2024

- **Production Support:** Managed 24/7 technical operations, using automated health checks to hit a 99.9% application availability threshold.
- **Root-Cause Analysis:** Conducted targeted system health and network diagnostic checks to isolate performance bottlenecks and patch environment failures.

EDUCATION & RELEVANT CERTIFICATIONS

- **WorldQuant University:** Applied Data Science Lab | *In Progress*
- **SAP:** Modernizing Integration with SAP Integration Suite | Mastering SAP CIAM | Creating Data Connections for SAC | Discovering SAP Sales and Service Cloud | RISE with SAP Methodology
- **Cisco Networking Academy:** Cyber Threat Management | IT Customer Support Basics
- **Zendesk Academy:** Certified Customer Support Agent | Certified Zendesk AI Specialist
- **AWS:** Certified Cloud Practitioner (CLF-C02)
- **Cybersecurity:** TryHackMe Global Top 5% Placement (Pre-Security Path)
- **Education:** Undergrad Units Earned, B.S. Geodetic Engineering | Caraga State University

PROFESSIONAL & CHARACTER REFERENCES

- **Cami Project (DevSecOps Initiative):** Contact for technical validation and project performance review available via project documentation lead.
- **Law Office and Realty:** Detailed operational and administrative references available upon request.
- **GSMS (Engineering & Mapping Logistics):** Detailed infrastructure and technical support references available upon request. *(Full contact details available upon request for privacy.)*
